

Angel Haze, Candles

I'm, I, I
I'm, I, I

Drift I, meet with the dark
Be what you loving the head for...
Into the sun whoever you are
Swear to your... with a cross on my heart
Follow my thoughts, with the...
Whatever this is I'm departing to you baby
Perfection is good, but you have my heart
It's a definitely yes
It's not like the beauty, avengers' bless
Nature has told me perception is left
I can see you struggling beautifully
Paint the whole ceiling,
Look ahead: you and I

Just want to dance forever,
Could we dance forever?

I think I'm obsessed with you,
If the world is in your zoom
I don't think that I could take it!
What's the point in messing 'round
If we both know what we've found?
Forever baby we could make it!

You said: It's human nature, we own the night
But I'm so burning, burning
If we're in danger, if time was burning
And so we're moving like the flames

Let the candles burn slow!
Forever you and I wanna be,
In this moment,
We're just making too much
Less to worry and go, it's just you and me
And you're only let the candles burn slow!
Forever you and I wanna be,
In this moment,
We're just making too much
Less to worry and go, it's just you and me
And you're only let the candles burn slow!

I took you where the leaves are bright
Fall is your favorite season, right?
I don't think I heard you clearly
Oh, I can barely sleep at night
Funny, you're the reason why
I don't think you need to fear me
We should

We should keep dancing
We should keep trying
We should keep burning bright and blue
Oh, we're in danger
Cause time is flying
And soon we'll both be lifeless too

Let the candles burn slow!
Forever you and I wanna be,
In this moment,
We're just making too much
Less to worry and go, it's just you and me

And you're only let the candles burn slow!
Forever you and I wanna be,
In this moment,
We're just making too much
Less to worry and go, it's just you and me
And you're only let the candles burn slow!

Let them candles burning
Let them candles burning

You told me you ain't wanna do it
Said love was for stupid people and cupid
I swore to you that I could make you lose it
And now I got you dancing to my music
Got you dancing to my music
Shake it, make it, move it
