

Angela Via, Wake Up With Me

I wish we could
I wish we could
I wish we
I wish we

You know it's so unfair
This life sometimes
When it never lets me fulfill
The deepest desire I have inside
If we could disappear
And fly away to a paradise
A place where only you and I
To unleash this fantasy

Then I could love you every night
Hold you until the morning light
No one to say what's wrong or right
The way it has to be
Wish I could love you every night
Hold you until the morning light
No one to say what's wrong or right
Oh how I wish, I wish we could be free

I'm living through this heart of mine
But I would let you come inside
'cause I was told it would be a crime
For us to share this love
But love is not a selfish need
Why if I take it must I bleed?
Or is that how it's meant to be
If only we could live inside my dreams

Then I could love you every night
Hold you until the morning light
No one to say what's wrong or right
The way it has to be
Wish I could love you every night
Hold you until the morning light
No one to say what's wrong or right
Oh how I wish, I wish we could be free

Every night I wanna be with you
Doing all the things we wanna do
(Oh baby) A place for only you and me
To unleash these fantasies
Oh how I wish I could be free with you
To do all the things I've dreamed to do baby
I would give you all the love you could need
Oh how I wish we could be free

Then I could love you every night
Hold you until the morning light (My love)
No one to say what's wrong or right (what's wrong or right)
The way it has to be (the way it has to be)
Wish I could love you every night (love you every night)
Hold you until the morning light (the morning light)
No one to say what's wrong or right (what's wrong or right)
Oh how I wish, I wish we could be free (The way it has to be)
