

# Angelic Upstarts, Last Night Another Soldier

Last night another soldier, last night another child  
No one seems to worry, no one sees his mother cry

Can you see that smart, clean soldier,  
Standing straight and oh so proud  
He wants to fight for Queen and country  
He wants to make his family proud

A job with the future, his way to get out of it  
It's his sense of romance, it never ends that way  
Last night another soldier, last night another child  
No one seems to worry, no one sees his mother cry

They're just facts and figures on your TV screen  
Another child and another soldier, is peace just a dream

In the country strange and foreign all the people resent him  
He can't cope with his problems, all the fears and hatred

Now he wish he never went he wish he never thought of it  
It's not the same as fighting armies looking for the terrorists

They're just facts and figures...

Can you hear the mocking laughter from the ones that gain by it  
They're not in line for the bullets, they're the ones who started it

They're just facts and figures...

Last night another soldier, last night another child  
Just a number in the papers, another one of the innocent

They're just facts and figures..
