

Angels & Agony, Darkness

We knew it would end one day
Never thought it would be that soon
We could talk for days and nights
Always fear it would cross our way

We talked about how life could end
Would anything lie behind
The black door was just ajar
Then you slipped inside

It's been long ago since we talked
It seems like forever
Since you went away

You're my shadow
You're my guardian from darkness
Where ever I will go

I know you'll follow
No reluctance and no complaints

Wrapped in silence
I feel you're always near
Every step in life you'll be there
From my cradle to my grave
We knew it did end that day
Never thought it would be that soon
Still we talk for days and nights
Your light shining on my way

When you see what I've become
How I make it through the day
Nobody can comfort me
I still follow your way
