

# Angels & Airwaves, A Little's Enough

When all is said and done  
Will we still feel pain inside?  
Will the scars go away with night?  
Try to smile for the morning light  
It's like the best dream to have  
Where every thing is not so bad  
Every tear is so alone  
Like God himself is coming home to say

I...  
I can do anything  
If you want me here  
And I can fix anything  
If you let me near  
What are those secrets now  
That you're just scared to tell  
I'd whisper them all aloud  
So you can hear your self

The trees were the first sign  
The deepest blue, the clearest sky  
The silence came with the brightest eyes  
And turned water into wine  
The children ran to see  
The parents stood in disbelief  
And those who knew braced for the ride  
The earth itself it came alive to say

I...  
I can do anything  
If you want me here  
And I can fix anything  
If you let me near  
What are those secrets now  
That you're just scared to tell  
I'd whisper them all aloud  
So you can hear your self

I'm sorry I have to say it but you look like you're sad  
Your smile is gone  
I've noticed it bad  
The cure is if you let in just a little more love  
I promise you this  
A little's enough  
I'm sorry I have to say it but you look like you're sad  
Your smile is gone  
I've noticed it bad  
The cure is if you let in just a little more love  
I promise you this  
A little's enough

I'm sorry I have to say it but you look like you're sad  
Your smile is gone  
I've noticed it bad  
The cure is if you let in just a little more love  
I promise you this  
A little's enough  
I'm sorry I have to say it but you look like you're sad  
Your smile is gone  
I've noticed it bad  
The cure is if you let in just a little more love
