

# Angels & Airwaves, Love Like Rockets

"Through the marvels of scientific advance  
My voice is coming to you from a satellite circling  
In outer space.  
Through this unique means,  
I convey to you  
And to all mankind  
America's wish  
For peace  
On Earth."

I held my head, as it left the ground  
The belts grew tight, as the blast grew loud  
The loving wish, whispered in my ear  
Please leave with grace, all the best my dear, yeah.  
Its like...I held your hand as I pulled you in  
Your lips sealed tight, ready to begin  
I kissed you first then you kissed my ear  
If I ask you once, will you ask me every year.

Do you feel alive?  
(Imagine, Imagine..)  
Do you feel alive?  
(Imagine, Imagine..)

The sun, it set in the night time sky  
The stars they cast a glow upon my eyes  
The Earth itself a burning ball of light, yeah.  
Its like...and our first love was ignited, late that night.

Do you feel alive?  
(Imagine, Imagine..)  
Do you feel alive?  
(Imagine, Imagine..)

The stars in your eyes, light up the sky  
With all its light, and fire, and sound  
The stars in your eyes, light up the sky  
With all its light, and fire, and sound

The stars in your eyes, light up the sky (Do you feel alive?)  
With all its light, and fire, and sound (Imagine, Imagine..)  
The stars in your eyes, light up the sky (Do you feel alive?)  
With all its light, and fire, and sound (Imagine, Imagine..)  
The stars in your eyes, light up the sky (Do you feel alive?)  
With all its light, and fire, and sound (Imagine, Imagine..)  
The stars in your eyes, light up the sky (Do you feel alive?)  
With all its light, and fire, and sound (Imagine, Imagine..)
