

Anggun, Dream Of Me

Hembusan bayu... antar dirimu
Let me
Be the blue inside of the flame that you feel
The heat
To hold on till you are here

Biarkan kujadi mentari

Keep me
In your smile so sweet when you turn off the light
And we'll be
Together in all our nights

Dan kuhangatkan semua mimpi

Dream of me
Before you go, I'll show you just how
I'll make you dream of me
Till night is over
Dream of me
Just a breath away in the dark
I'll make you dream of me
Come to me now

We move
So free and easy just like it should be
Just you
Can give me all that I need

Hanya dirimu yang kunanti

I'll fly
Find my way back to you in your deepest hours of sleep
A nightride
To my favourite fantasy

Semua keinginan hati

Dream of me
Before you go, I'll show you just how
I'll make you dream of me
Till night is over
Dream of me
Just a breath away in the dark
I'll make you dream of me
Come to me now

My desire never ends
Will you meet me where the shadows blend
Light the stars up in my sky
Got to know that you are still mine

Take me with you when you go
When you get so lonely and so cold
Hold on to me every night
Close your eyes, let your love go flying
Let your love go flying
