Anggun, Dream Of Me

Hembusan bayu... antar dirimu Let me Be the blue inside of the flame that you feel The heat To hold on till you are here

Biarkan kujadi mentari

Keep me In your smile so sweet when you turn off the light And we'll be Together in all our nights

Dan kuhangatkan semua mimpi

Dream of me
Before you go, I'll show you just how
I'll make you dream of me
Till night is over
Dream of me
Just a breath away in the dark
I'll make you dream of me
Come to me now

We move So free and easy just like it should be Just you Can give me all that I need

Hanya dirimu yang kunanti

I'll fly Find my way back to you in your deepest hours of sleep A nightride To my favourite fantasy

Semua keinginan hati

Dream of me
Before you go, I'll show you just how
I'll make you dream of me
Till night is over
Dream of me
Just a breath away in the dark
I'll make you dream of me
Come to me now

My desire never ends Will you meet me where the shadows blend Light the stars up in my sky Got to know that you are still mine

Take me with you when you go When you get so lonely and so cold Hold on to me every night Close your eyes, let your love go flying Let your love go flying
