Past Lives

How would you feel
If the foot was on the other shoe?
And this time around
The beard it would be you

To make love and caress
In one magical night
And learn the very next day
You hadn't got it right

I can't even fathom
I sing about you still
Must be those memories of lives ago
When my heart was so fulfilled

Yes your eyes tell a tale
About a thousand years ago
But like those rickety old ships
We're tossing to and fro

I mighta known you in past lives
But the future ain't so clear
The pace and what we decide
Means our paths will likely veer

You say you've known me
Longer than all your life
You talk about love
But you're living night to night

Through your lens
Every moment lasts forever
But it's only a snapshot baby
You'll change just like the weather

You're high resolution
And your fast as hell
And there's no defense
When you cast one of your spells

You say you've known me
Longer than all your life
You talk about love
But you're living night to night
