

Anni Frid Lyngstad, I Got Something

Anni Frid Lyngstad

Miscellaneous

I Got Something

I got something

You never never never had before

I got something

I never never never gave away before

No other woman can give it to you

No other woman can do what I do

No other woman no no

I got something

I know you've been around there

You've had your shares of ups and downs

Been through too many lovers

Had a taste but never a bite

But look here

What I got for you

It's love and it's true true true

I got something

I got something

You never never never had before

I got something

I never never never gave away before

No other woman can give it to you

No other woman can do what I do

No other woman no no

I got something

Some say you've seen it all

That you were the first man on the moon

That you got tired of flying

And ended up not really doing a thing

You talk a lot about your friends

How influential some of them are

Forget your hot connections

You don't have to sell it to me

But look here

What I got for you

It's love and it's true true true

I got something

I got something

You never never never had before

I got something

I never never never gave away before

No other woman can give it to you

No other woman can do what I do

No other woman no no

I got something

No no no no

No no no no

I got something
