

# Anthony Callea, When I Get There

I wish that I could breathe  
A moment just to be here  
A chance to take it in  
Before I have to leave

So this is how it feels  
To walk into a daydream  
Can't tell you how my heart sings  
To see it all for real

When you do what you lov, it feels amazing  
If you do what you love, you can do anything you want

I always said when I get there  
I'll change the world, I'll take more care  
I'll touch the sky, be more prepared  
When I get there

The road rolls on and on  
It twists a while and then returns  
When here turns into there's long gone  
Before we notice

When you do what you love, it feels amazing  
If you do what you love, you can do anything at all

I always said when I get there  
I'll change the world, I'll take more care  
I'll touch the sky, be more prepared

I packed my bags  
I left the room  
There's nothing more that I can think to do  
Now I need to breathe  
I just need to breathe

I always said when I get there  
I'll change the world, I'll take more care  
I'll touch the sky, be more prepared
