

Anthony Smith, Airborn

I wanna know, who invented the wheel.
Tell me who discovered steel.
It was the wheel and the steel that caused this pain,
That made the car that took her away.
I wanna know, who invented the wheel.

I wanna know, who found the rock.
Tell me who made the black top.
It was the rock and the black top that caused this pain,
And made the road for the car, that took her away.

Chorus.
Somebody give me a name.
I just need someone to blame.
For all of this heartache,
And pain I've been feelin' since she let me go,
I wanna know.

I wanna know who invented the time.
Out in this spand when she was mine.
It was all that time I didn't take,
It was the rock and the black top that made the highway,
For the wheel and the steel for the car, that took her away.

Chorus repeated:
Somebody give me a name.
I just need someone to blame.
For all of this heartach,
And pain that I've been feelin' since she let me go,
I wanna know.
I wanna know.

I wanna know who invented the wheel.
