## Apocalyptica, Path Vol.2

[Special Edition track]

[Featuring Sandra Nasic]

I want to live in fire
With all the taste I desire
It's all good if you let me dive
With some sharks on the ground

You loose your routine You loose your routine You loose your routine Cause I found my path

What the hell are you trying
Now I know there is something more
What happened to you
Still staying on my path
Are you still denying
Now I know there is something more
That this is the truth
It's all in you

What do you came for What did you expect to find What do you came for What did you expect to find What do you came for What did you expect to find What do you came for What did you expect to find What did you expect to find

So boundless I feel And boundless all my fears Stop running back to old times

You loose your routine Cause I found my path

What the hell are you trying
Now I know there is something more
What happened to you
Still staying on my path
Are you still denying
Now I know there is something more
That this is the truth
It's all in you

What the hell are you trying
Now I know there is something more
What happened to you
Still staying on my path
Are you still denying
Now I know there is something more
That this is the truth
It's all in you
