No longer any place mother nature can hide now Far from space culture Dazzling, spacial

That the instant the omega point's reached ... With gain control of all matter and forces Now all mean a single universe But in all universes in existence is logically possible

Life will spread to all spacial regions in all universes Which can logically exist

We have stored an infinite amount of information Including all this knowledge which is logically possible to know

No longer any place mother nature can hide Far from space culture

Exude your phenomena, exude the phenomena

Turn it on, dazzling, spacial

Come back, dazzling, spacial Distant cosmos
