

# Apulanta, Days

Stay, or don't stay  
Come around, and join my party  
Come, rub the salt in my wounds

In love again  
With the sound of distant laughter  
You made us beautiful  
Made us strong

Days when I love you  
Days when I crave to be with you  
Days when I scream  
Days when I bleed

A world full of pearls  
And a star for us to follow  
Screams in the dreams woke us up

Things that you do  
Like the sand between your fingers  
You made us beautiful  
Made us torn

Days when I love you  
Days when I crave to be with you  
Days when I scream  
Days when I bleed

Calling your name in the night  
The shadows answer  
Leave what is left for the crows

Take what you take  
But the beast is always hungry  
You made us beautiful  
Made us dead

Days when I love you  
Days when I crave to be with you  
Days when I scream  
Days when I bleed

Days when I love you  
Days when I love you  
Days when I love you  
Days when I love you
