

# Arcwelder, Doubt

(w graber)

Hey - And did you want to help me out?  
And help this fear and help this doubt  
For what it's worth I have my doubts

So - when all is good and all is right  
And you make day from what is night  
I found this balance nature's right

[chorus]

Take this down and put it somewhere safe  
And when it dies you'll call it rape  
If thoughts are life then I don't think  
So tell me who it was this time

Now - now climb the side of Marburg cliff  
With blood red moss instead of dirt  
It's filled with every fear that's lurked

Well - well if you're counting, count on us  
We'll help you find what you have loss  
Well if it counts you've lost my trust

[chorus]

So this right I have my doubts  
So this is something I have my doubts  
So nothing is something I have my doubts
