

Arcwelder, Free Me

(s macdonald)

(These are the Entropy lyrics - the lyrics on the Rev105 Radio Archive CD vary slightly)

I've stepped out I'm free

Now it's time to peddle my own wares

What's alright with me

Has never been a priority of theirs

I was so sick of it all

No way to be

[chorus]

Free me, let me out

Release me, from this doubt

And I know that I don't ever want to pass this way again

So glad to be gone

Living my life at a slower pace

I'm off with a yawn

Taking time off from the rat race

I'll have no regrets

When all's said and done

[chorus]

It was all I could take

It was all I could fake

It was all I could forsake

At the time

You go ahead

Screw yourself into the ground

I'll take it easy instead

Enjoy some life while I'm around

At the end of my time

It's me who'll be proud

[chorus]

It was all I could take

It was all I could fake

It was all I could forsake

I'm alive
