

# Area-7, Let Me Down

It's the morning, I wake up all alone  
Surrounded strangely, I know I'm far from home  
I hit the road but will it lead me back to you?  
I don't know where you are, but there's nothing else to do  
Well I still love you but you always let me down  
Everything you do just makes me want to frown  
Betrayal hurts I don't know why I stick around  
Well I still love you even though you let me down [DOWN!]  
Hey!  
Well I still love you even though you let me down  
Everything you do just makes me want to frown  
Betrayal hurts I don't know why I stick around  
Well I still love you even though you let me down [DOWN!]  
Hey!  
Poison pen, a poison heart, a poison mind  
The more I look the worse things you let me find  
And you love letter, not from me but it's from you  
Some other sucker's gonna suffer for you too!  
I still love you even though you let me down  
Everything you do just makes me want to frown  
Betrayal hurts I don't know why I stick around  
Well I still love you even though you let me down [DOWN!]  
Hey!  
You always let me down, go!
