

Arecee, Take A Few

I'm not a-roks cousin so why ya buzzin'
I probably heard half a dozen to a hundred
You need a point of reference, well that's a nice effort

If you sniff too much pepper then you'll probably sneeze
And if you smoke too much weed then you'll get wheezy
If your broke and take it easy and ya got big dreams then they probably won't ever be achieved, tho
One, two, three, that's the speed of the sea
But that's not the wind, see you just felt a little breeze
I know you like me teasing, don't chew when you eat
Your soap opera's hip-hop while I fell asleep
See life is complex and there's more then one concept
You can accomplish much more then one project
You got a push button object but your off topic
You and I both humans but completely different products see
Some melodic and some scrap robotics that never really got it
Subject to an audit
Psychotic in their own right but ain't none left
Stressed me out at first but I think it's for the best
Stay depressed, while I obsess, about success you stay rested
I'm a bit pessimistic this much I confess
But I'm pressed to my desk while ya'll just digress

Take one, take two, take three
Stand around long enough it might come for free...
Take one, take two, take four
Leave it all to chance and you might just score...
Take one, take two, take five
If it's too deep then don't even dive
Don't strive, it's enough to be alive
I'll take yours you take your time

Some move around and some just pace
Some get success and some just taste
Complacent bein' stationed in one place safe with they shoes unlaced in a comatose state
Take one, take two, take twenty-five thousand
Always been allowed but I guess it ain't arousing
I get a little drowsy when I'm starin' at the clouds
But I keep a pocket watch to tell what time allows
Mouths talk a lot and the lips move frequent
But just speaking don't really have that much meaning
It seems the machines keep runnin' outta steam or need to be cleaned
CLEEEEEEEEEAN
I'd like to intervene but I can't stop the bleeding
You can't apply pressure when the heart's not beating
If the lungs don't breathe then they might be sleeping
Let 'em count sheep and awake another evening
It ain't misleading and don't look for meaning
I ain't demeaning peoples, just wonder bout their reasoning
Season's change like MC's names
Still many seem satisfied home on the range
I like the pain, I dig the struggle
Movin' with my shovel instead of being subtle
The trouble is I'm kinda seein' double
Gotta keep my eyes on the balls bein' juggled

Take one, take two, take three
Stand around long enough it might come for free...
Take one, take two, take four
Leave it all to chance and you might just score...
Take one, take two, take five
If it's too deep then don't even dive
Don't strive, it's enough to be alive
I'll take yours you take your time
