

# AronChupa & Little Sis Nora, California Sun (feat.

In the California sun  
In the California sun  
I'll be long long gone  
In the California sun

I been driving through the city  
I've seen the crack heads and the whores  
Finding hope inside a bottle  
But I know they were meant for more

In the California sun  
In the California sun  
I'll be long long gone  
In the California sun

In the California sun  
In the California sun  
I'll be long long gone  
In the California sun

I'll be long long gone  
In the California sun  
In the California sun  
I'll be long long gone  
In the California sun

I been driving through the city  
I see the crack heads and the whores  
Finding hope inside a bottle  
But I know they were meant for more

I know they call it the city of angels  
But all of your dreams get murdered and dies  
Still I'm like the rest  
I what that high

In the California sun  
In the California sun  
I'll be long long gone  
In the California sun

In the California sun  
In the California sun  
I'll be long long gone  
In the California sun

I'll be long long gone  
In the California sun  
In the California sun  
I'll be long long gone  
In the California sun
