

# Artillery, At War With Science

Polution has caused destruction of life  
We are warned by Nature ignore it and die  
Chemical warfare, Nuclear attack  
All causes changes of what's after that

The positive research once made by the Science  
Has been turned against as by the Authority  
Once a free Planet now trapped in this Nightmare  
Where success was expected a failure to be

Before - we lived life in pleasure  
We loved - we had natural births  
In blood - we pay for our weakness  
We are - at war with Science

From Testtube to womb a new life beginning  
Sterile injected but doomed to be freak  
Experiment with life genetic confusion  
With Science as weapon perfection to seek

Before - we lived life in pleasure  
We loved - we had natural births  
In blood - we pay for our weakness  
We are - at war with Science
