

As Fast As, Gretchen My Captain

Frost on the porthole
It doesn't look so angry after all
We're low on water
It was a one-way mission after all
Gretchen my captain
So strong I never noticed your blue eyes
Never looks hungry
I guess I shouldn't have been so surprised

What would your mother say to that
If she found out about your friend
What would your father think if he knew you and I had before and will again

I find it painful to see your face and finally know that I
Don't have what you need
I never will, not even up so high
Six months till we die
You love me, yes I know and so do I
Red rock like concrete can't swing you to my side and change your mind, no it can't

But, what would your mother say to that
If she found out about your friend
What would your father think if he knew you and I had before and will again

What would your mother say to that
If she found out about your friend
What would your father think if he knew you and I had before and will again
What would your mother say to that
Would your mom say
If she found out about your friend
About your friend
What would your father think if he knew you and I had before and will again
