

# Ashcroft Richard, Science Of Silence

Ashcroft Richard  
Human Conditions  
Science Of Silence

We are on a rock, spinning silently  
But I'm safe when you're here with me  
These questions I'm asking, they've been haunting me  
I need some security, can't you see?  
Her love was like a fountain rushing and pouring down  
The darkness is putting out the light in me  
She's a well to be dug, she's a university  
A cosmic library - wait and see

We are on a rock, spinning silently  
Won't you get close to me  
We are on a rock, spinning in infinity  
Won't you get close to me

Is it my genes that have made me?  
Is it the things I took, is it the things I said  
Does karma rule?  
Well if there's a God well can you hear me now?  
I am crying out, hoping you know  
And in my baby's arms I need no faith  
I need no words to define myself  
And when I'm holding you, light rushing through  
I wanna make it now, safe and straight

We are on a rock, spinning silently  
Baby get a hold of me  
We are on a rock, spinning in infinity  
Baby consoling me

Oh I don't know when the fear's going to end  
I don't know if my prayers are received - the ones I send  
(We are on a rock, spinning silently)  
I can't live in pain and fear  
(We are on a rock, spinning in infinity)  
Oh I see so much joy and it makes me scared  
(We are on a rock, spinning silently)  
Oh I don't know if my prayers are received, until the end  
(We are on a rock, spinning in infinity)  
Oh I guess it ain't offet for you to pray for peace  
Oh baby I don't know where I'm going  
All I know is that I need you as a friend
