

Ashton Allen, Starting Over

Left you there in the moon
To slip away with the sun light
Its gonna get better soon
And everything will be alright
So tear it off of your skin
And let it heal in the open
Start all over again
I wasn't who you were hoping for
But every day is a new day
Its sure as the stars in the sky
And every waking moment
We're starting over
Call you out of the blue
Messing with your emotions
I can't believe that its true
I'm still as deep as the ocean
But every day is a new day
Its sure as the stars in the sky
And every waking moment
We're starting over
But every day is a new day
Its sure as the stars in the sky
Believing in a new way
Is hard as the days that go by
And every waking moment
We're starting over
Left you there in the moon
To slip away with the sunlight
Its gonna get better soon
And everything will be alright
We'll be alright.
