

# Ashton Allen, Starting Over

Left you there in the moon  
To slip away with the sun light  
Its gonna get better soon  
And everything will be alright  
So tear it off of your skin  
And let it heal in the open  
Start all over again  
I wasn't who you were hoping for  
But every day is a new day  
Its sure as the stars in the sky  
And every waking moment  
We're starting over  
Call you out of the blue  
Messing with your emotions  
I can't believe that its true  
I'm still as deep as the ocean  
But every day is a new day  
Its sure as the stars in the sky  
And every waking moment  
We're starting over  
But every day is a new day  
Its sure as the stars in the sky  
Believing in a new way  
Is hard as the days that go by  
And every waking moment  
We're starting over  
Left you there in the moon  
To slip away with the sunlight  
Its gonna get better soon  
And everything will be alright  
We'll be alright.
