

ATB, Black Nights

1,2,3,4

Black night, white lights
Your eyes amplify
Like a heartbeat
On the downbeat lover

Black night, white lights
On the B-side
I found what I was after

Black night white lights
You're so crazy nice
Like a small town
Filled with skyscrapers

Black night white lights, So divine
Take me downtown be my saviour

And the whole world is you
On this black night
Make everything come true
Under white lights

You're on my radar
On my radar
With your designer love
Before things get much crazier
There's something you should know

You're on my radar
On my radar
With your designer love
Sometimes when I watch you sleep
I think I made you up

You're on my radar
On my radar
With your designer love
Before things get much crazier
There's something you should know
Your on my radar tonight

Black night, white lights
Your hand is locked in mine
Like a chain link
Sealing the exit

Black night, white lights
R.G.B.Y. this photo says I'm taken

Black night white lights
You're so crazy nice
Like a small town
Filled with skyscrapers

Black night white lights, So divine
Take me downtown be my saviour

And the whole world is you
On this black night
Make everything come true
Under white lights
