

ATB, Communicate

Let's quit on this - 'cause I need space now
That's what you said to me - that's what you did to me
Where did this start and where does it end now
What do you came for
I've never been so sure
And I whisper while you speak
And I scream while you sleep
But I always will be where you are
And when silence turns into hate
It's time to communicate
And I always will be where you are
Here's what it takes to take a stand now
You'd better speak your mind
You'd better ease your mind
Where did we start and where do we go now
Was it your plan to leave - everything up to me?
And I whisper while you speak
And I scream while you sleep
But I always will be where you are
And when silence turns into hate
It's time to communicate
And I always will be where you are
