One Million

There was just one
at the top of a pile of one million
and she hasn't got a clue that she's become
A good Samaritan

I missed her name
before I blinked from the scene
she'd run her way
if I got the chance to meet her once again
what would I hear her say?

It was just one of those things
I needed to deal with
It was just one of those things
It was just one of those things
I needed to deal with

There was just one
at the top of a pile of one million
and there's no way
you've counting all our loss
what was I thinking of?

As it kicked off
I kept myself to myself and looked away
should have put my foot in but I just stayed
wrapped up in my own world

It was just one of those things
I needed to deal with
It was just one of those things
It was just one of those things
I needed to deal with

There was just one
at the top of a pile of one million
and she will be there for many years to come
Wondering where I am

It was just one of those things
I needed to deal with
It was just one of those things
It was just one of those things
that I should have dealt with
It was just one of those things

(low)

This is just one of those things
you needed to deal with
This is just one of those things
This is just one of those things
you needed to deal with
This is just one of those things

(techno)

This is just one of those things
I needed to deal with
This is just one of those things
