## Athlete, Shake Those Windows

Lives in Edinburgh Just across the road Sometimes my stereo And in my aching bones It's on the sugar hill And in your ring tone

Shake those windows Sums and songs and Beats and rhymes And I like this blackout It just helps to Love those clear night skies

Just let the record play And bring it back again You can't appreciate What we were into then

In two seconds
The beat was recognised
And all the old school heads
Nodded back in time
And though we just met
I've known you all my life

Shake those windows Sums and songs and Beats and rhymes And I like this blackout It just helps to Love those clear night skies

Just let the record play And bring it back again You can't appreciate What we were into then

Just let the record play And bring it back again You can't appreciate What we were into then

Just let the record play And bring it back again You can't appreciate What we were into then

Just let the record play And bring it back again You can't appreciate What we were into then

Just let yourself go Just let yourself go Just let yourself go Just let yourself go

Just let yourself go Just let yourself go Just let yourself go Just let yourself go
