

# Athlete, The Unknown

Let your world be wide open  
And your fears be blown apart  
May your voice be louder than bombs  
Somewhere in silence find one to trust  
Lift your head up, untie the knot  
My little sunshine hope is never light years away  
Let your senses be ignited  
By streams of neon singing in the dark  
Connected to the planet  
A million neighbors, a sea of stars  
Lift your head up, untie the knot  
My little sunshine hope is never light years away

Leaders, lovers come and go  
Outside forces you can't control  
I see you smiling at the unknown  
I see you smiling at the unknown  
Lift your head up, untie the knot  
My little sunshine hope is never light years away  
Lift your head up, untie the knot  
My little sunshine hope is never light years away  
Hope is never light years away  
Hope is never light years away
