

Atom And His Package, Lord It's Hard To Be Happy

12 inches per foot two pints per quart why don't we make it easy? The English system of measurement is a pain in the ass. The metric system is so much easier. I mean, 1000 milligrams is a gram. 1000 grams is a kilogram. 1000 kilograms is a metric ton. It's so simple. The English system is a mess. 12 inches per foot two pints per quart why don't we make it easy? The English system of measurement is a pain in the ass. The metric system is so much easier. I mean, 1000 milligrams is a gram. 1000 grams is a kilogram. 1000 kilograms is a metric ton. It's so simple. The English system is a mess.
