

# Aus Rotten, The Flag Will Cover Coffins

Burn your countries flags

F\*\*k your patriotic pride

F\*\*k the politicians and the shit they try to hide

They make you pay their taxes and they make you fight their wars

But they won't feed the hungry and they don't care about the poor

Instead they try and take you for all your f\*\*king worth

And they separate with flags all the people of the earth

They exploit our different cultures and enhance our sickening greed

And they get the hatred rising which is exactly what they need

But what about the people's needs

Will they be unfulfilled

Ane what of those who speak out? Will those "traitors" then be killed?

The only traitors that exist are the traitors to mankind

The ones who put the money first and the people's need behind

They say is we don't love our country then get the hell out

Should we be thankful to die in battle for what our flag's about?

Well f\*\*k off

F\*\*k you

F\*\*king hear this

Your ignorant petty support doesn't mean piss

Don't support, no matter what the cause

Your f\*\*king flags and damn religion just feed corporate claws

I renounce my citizenship from the U.S.A. and I'd suggest the same for any country

Because countries kill the people's will with their patriotic lie

And every f\*\*king day you're killing who they say and you never even wonder why

Why do we blindly follow what our leaders have to say?

Instead let's make them answer to the people they betray

We don't owe our leaders anything so f\*\*k what they demand

Then disregard their f\*\*king lies and bury them where they stand

The flags will cover coffins where these f\*\*kiers will now lie

And we'll give a flag to their families when these poor bastards die

Natonalistic pride is f\*\*king shit why can't the people see

As long as flags fly up above us no one's really free

Free?
