

Autamata, Postscript

And now this day
The things I've seen in this age
My skies have changed,
My skies have changed
Find a place of worship and be still
There are no words for this ill

But how can we fight this bloody war with not enough soldiers?

We're a man down
We're a man down
We're a man down
And I had him but we lost him coming out

I fear the future now I must confide
Please take your place at my side
But how can we fight this bloody war with not enough soldiers?

We're a man down
We're a man down
We're a man down
And I had him but we lost him coming out

Find a place of worship and be still
There are no words for this ill
But how can we fight this bloody war with not enough soldiers?

We're a man down
We're a man down
We're a man down
And I had him but we lost him coming out
