## Automatic, Jack Daniels

What happened to us we used to be so confident That thing's would be okay I never realised that something was wrong Til a part of me had started to decay

Feel like a rocket without fuel I fail to breathe, escape velocity Come crashing down, sucked in by my whole world A fucking tragedy

Tonight, it's time to leave this town And get out of here It's too late to try and start again So get out of here

What happened to you You never replied to my letter I don't know if you're alive or dead Never forget those feelings It's like I am feeling it all again

You never really forget You never really forget You never really forget You never really forget (repeat)

Tonight, it's time to leave this town And get out of here It's too late to try and start again So get out of here

Tonight, it's time to leave this town And get out of here It's too late to try and start again So get out of here
