

# Autumnblaze, Cold

Scarred  
Your back was turned  
Curled like an embryo  
Take another face  
You will be blessed again  
I was cold as I mouthed the words  
And crawled across the mirror  
I wait  
Await the next breath  
Your name  
Like ice into my heart

A shallow grave  
A monument for the ruined age  
Ice in my eyes  
And eyes like ice don't move  
Screaming at the moon  
Another past time  
Your name  
Like ice into my heart

Everything as cold as ice  
Can no one save you?  
Everything as cold as silence  
And you will never say a word

Your name like ice into my heart
