

Avril Lavigne, Fly

There's a light inside of all of us
It's never hiding you
Just have to light
It's the one thing that you got to trust
It's like a diamond
You just have to find it

So if you ever feel like giving up
Yes, you just remember:
We're all meant to fly

Spread you wings across the Universe
It's your time to
It's your time to shine
There's a light inside of all of us
Soon you will find that
It's your time to fly
Your time to flu

A little help is all it ever takes
Somebody else to tell you it's worth fighting
A single step becomes a leap of faith
That's when you realized you started flying

So don't you ever say
Tou;re giving up
No, there's no looking back
Cuz we're all meant to fly

Spread you wings across the Universe
It's your time to
It's your time to shine
There's a light inside of all of us
Soon you will find that
It's your time to fly
Your time to flu

Just reach up, don't give up until you've touched the sky.
Just reach up, don't give up until you've realized that we were all meant to fly
