

# Avulsed, 4 N Sick

Cold cadavers open wide  
In the dissecting stretcher with rigid factions  
Eviscerating limbs nearly petrified  
Reeking viscous fluids in livid putrefaction  
But to avoid these nauseous odours  
The only way is a living autopsy  
Getting high patients with perfect health  
Flesh palpitating organs to extract  
Bright kidneys, spongy pulmons, dense liver  
Juicy spleen, red meaty heart  
Hot pancreas, slimy stomach, gooey urethra  
Relaxed backbone, twisted intestine  
4 n sick  
To get a perfect unknown candidate  
It had to be a worthless homeless without any family  
Male or female any sex was fine  
Nobody will miss a piece of white trash in his society  
It was weary to work with corpses  
To improve a promising forensic career  
Extracting living innards is the biggest experience  
It can't be compared, it's pure gore
