

# Awaken, Nothing Could Be Good

(B+R+M. Gibb / A. Galuten)

Baby when there's only one embrace

One is just enough for two

When do I learn

Young fingers get burned

Never my love

And when everyone has been a friend

Windy day we never knew

Now nothing can stand

The way it was planned

No baby nothing could be good as

Nothing could be good as loving you

Even though you're far away

Your movie plays in my mind

Your world is what you see

Let it be me

And I can make you warm at night

But I need to be sure you got love enough

To know

Never, never...

And when every cloud has lost its glow

Raining on my avenue

When do I hide

That nothing inside

When baby nothing could be good as

Nothing could be good as loving you

Even though you're far away

Your movie plays in my mind

Your world is what you see

Let it be me

And I can make you warm at night

But I need to be sure you got love enough

To know

Never, never...

And when everyone has gone away

Sing to the almighty

If it's what you need to feel

The world is real

And baby nothing could be good as

Nothing could be good as loving you

Even though you're far away

Your movie plays in my mind

Your world is what you see

Let it be me

And I can make you warm at night

But I need to be sure you got love enough

To know

Never, never...
