

Away From Here, The Day The Sun Died

BURN!!!

This changed your life
And fury overflows the mind
Retaliate, fight back
We're gonna kill, kill, kill
We fall down
Right where they want us
"They will feel it too";
Flying flags, and pledge allegiance

We'll burn those flags
And fuck allegiance
That's the real statement you show (X2)

The day we fell to their level
The day the sun died
The day every dream was burned
The day the sun died (X2)

We fall down
Right where they want us
"They will feel it too";
Flying flags, and pledge allegiance

We'll burn those flags
And fuck allegiance
That's the real statement you show (X2)

The day we fell to their level
The day the sun died
The day every dream was burned
The day the sun died (X2)

The day the sun dies is upon us
And the glow of your CNN comforts your black heart
Open your eyes, open your mind
Get out of this windowless room
Obsolete to the world outside
You need to put down your gun soldiers
Think for yourself
And put down your gun
Open your eyes, open your mind
And get out of this windowless room
(Comfort your black heart!!!...)

The day we fell to their level
The day the sun died
The day every dream was burned
The day the sun died (X2)
