

Axxis, Battle Of Power

Words can kill - we know why
'Cause war machines let freedom die
A timebomb ticks by this wrongs choice
SO raise your voice and shout out with one voice
Let us fight - fight - 'cause we shall overcome
Living in a battle of power that have just begun
Let us fight - fight - all for one and one for all
Let's break down this might and mend this world of pain
A modern war - a new crusade
Let's fight against the final fate
Worldwide sings of resistance
Rising high - let's take this chance
Let us fight - fight - 'cause we shall overcome
Living in a battle of power that have just begun
Let us fight - fight - all for one and one for all
So don't stand back you are not alone - you are not alone
Never ever give up what you're fighting for
Your thoughts are free to fly
They crucified rules and law
Justice for all is a lie
(Even if you die)
Let us fight - fight - 'cause we shall overcome
Living in a battle of power that have just begun
Let us fight - fight - all for one and one for all
So don't stand back - we are unite - you are not alone
Let us fight - fight - not alone
Fight, fight, fight, fight
'Cause we shall overcome
