

# Axxis, Dance In The Starlight

Moonlight eyes - you can break my spell  
I never thought that you wanna be mine  
I could not trust my eyes on that Saturday night  
Holdign you in the moonshine  
Light and shade - close together sometimes  
But you fade all the shadows away  
I feel the spirit of passion burnin' in me so let me say  
Dance in the starlight light up the dark night  
I'll never want to let you go  
Dance in the starlight and light up my life  
Oh our love will live and grow - live and grow  
Under the roof of god all our prayers come true  
Being one with the universe  
Midnight wind will blow my promise to you  
Let us embrace our mother earth  
Losing time - losing space - in this hot summer night  
Our witness will be our brother moon  
Watching out for us, sending words with the wind  
Listen to it's Midnight tune  
Dance in the starlight light up the dark night  
I'll never want to let you go  
Dance in the starlight and light up my life  
Oh our love will live and grow  
I'll never want to let you go  
Dance in the starlight  
Oh our love will live and grow  
Dance in the starlight light up the dark night  
I'll never want to let you go  
Dance in the starlight and light up my life  
Oh our love will live and grow  
Dance in the starlight light up the dark night  
I'll never want to let you go  
Dance in the starlight  
Starlight - I'll never want to let you go
