## Axxis, Dance In The Starlight

Moonlight eyes - you can break my spell I never thought that you wanna be mine I could not trust my eyes on that Saturday night Holdign you in the moonshine Light and shade - close together sometimes But you fade all the shadows away I feel the spirit of passion burnin' in me so let me say Dance in the starlight light up the dark night I'll never want to let you go Dance in the starlight and light up my life Oh our love will live and grow - live and grow Under the roof of god all our prayers come true Being one with the universe Midnight wind will blow my promise to you Let us embrace our mother earth Losing time - losing space - in this hot summer night Our witness will be our brother moon Watching out for us, sending words with the wind Listen to it's Midnight tune Dance in the starlight light up the dark night I'll never want to let you go Dance in the starlight and light up my life Oh our love will live and grow I'll never want to let you go Dance in the starlight Oh our love will live and grow Dance in the starlight light up the dark night I'll never want to let you go Dance in the starlight and light up my life Oh our love will live and grow Dance in the starlight light up the dark night I'll never want to let you go Dance in the starlight Starlight - I'll never want to let you go
