

# Axxis, Tales Of Glory Island (Extended Version)

Eyes at night lifeless they stare  
Through mist the fog and rain everywhere  
A ship no shore you're drifting alone  
No wind no help you sail on your own

Flash one look a light far away  
A voice I hear words seemed to be prayed  
A chance in a trance a dream comes true  
A magic island close to you

And I can hear the tales of glory Island  
I hear you crying through the rain  
I hear the tales of glory island  
I don't believe in what they say what they say  
On my way

I curse the days  
Where I Face the spell a sign a chime  
Hear bells toll and yell a ship a shore  
In an ocean of lies words and tales  
Are colder than ice

Hear hear fear fear the rumours around  
The echo will scream forever resound  
Hear a noise out of the dark  
At first a flame now fire will spark

And I can hear the tales of glory Island  
I hear you crying through the rain  
I hear the tales of glory island  
I hear in fever what they say what they say  
On my way

Oh let me lead you through cold and darkness  
And I will lead you through the storm  
The bells are ringing voices are singing  
Go into rapture now the spell is going on

And I can hear the tales of glory Island  
I hear you crying through the rain  
I hear the tales of glory island  
I hear in fever what they say what they say  
On my way On my way On my way  
On my way
