

Ayria, Analog Trash

I've got a secret
I've been watching you
I know you're damaged
But I still want you
You're analog trash
When life is digital
But I prefer you
I think you're beautiful

Pull back re-align
We are flawed by design
Unplug just for fun
Stop before we hurt someone
Standard uniform
Corporate life has gone too far
Excess commodity
I want you just for me

This little secret
Gives me something to do
My new obsession
To be like you
You're analog trash
When life is digital
But I prefer this
Unreplicable

Pull back re-align
We are flawed by design
Unplug just for fun
Stop before we hurt someone
Standard uniform
Corporate life has gone too far
Excess commodity
I want you just for me
I want you just for me
I want you just for me
I want you just for me
I want you just for me

I've got a secret
I've been watching you
I know you're damaged
But I still want you
You're analog trash
When life is digital
But I prefer you
I think you're beautiful

Come on
It's not what you think
Come on
Just come away with me
Come on
There's so much more to this
Come on
That life you will not miss

Pull back re-align
We are flawed by design
Unplug just for fun
Stop before we hurt someone
Standard uniform
Corporate life has gone too far

Excess commodity
I want you just for me
I want you just for me
I want you just for me
I want you just for me
I want you just for me

I want you just for me
I want you just for me
I want you just for me
