B*Witched, In Fields Where We Lay

There's a green hill far away In a land I know so well And the sun its shone so bright

In the fields where once we did lay (x2)

As we walked that winding road I remember oh so well The times we spent together

In the fields where once we did lay (x20

How we laughed and carved our names And declared our love forever On that old oak tree we found

In the fields where once we did lay (x2)

There's a green hill far away In a land I know so well And the sun it shone so bright

In the fields where once we did lay (x3)
