

# Baby Woodrose, All Over Now

People try to push me and put me down  
I can't ever find out what it's all about  
They call me a loser, a freak and a clown  
Had it up to here, man - but it's all over now

It used to feel right with you hanging around  
But I heard the way you're talking about me all over town  
If you can't get with it, get off of my cloud  
Two's a crowd, babe it's all over now

You ain't gonna tell me how to live no more  
It's all over now, it's all over now  
You ain't got the hold on me you had before  
It's all over now, it's all over now yeah

Sometimes I wish there was an easy way out  
I'd be gone by tomorrow without a doubt  
If you can't live with me, you can do without  
Take a look around, babe it's all over now
