

Bad Company, This Love

I know you're not just a pretty face
You've got style, you've got grace
But I do need to know you a little more
I've seen your picture as a little girl
Before the woman in you uncurled
But I do need to show you a little more
This love, will last us forever
This love, is gonna stay true
I know you've got what it's gonna take
You've got a heart and it won't break
But I do need to show you a little more
And I've got this feelin', it's so much like pain
You've got me reelin', but I still can't explain
I wanna show you, baby, just a little more
This love, will last us forever
This love, is gonna stay true
This love, will keep us together
This love, it's long overdue, yeah
This child, this girl, this woman that I dream about
She knows that I know, this love I couldn't live without
This love, will last us forever
This love, is gonna stay true
This love, will keep us together
This love, it's long overdue
This love
