

Bad Light District, Black Walls

I tried to use your eyes
And get to know world you live in
But I can see only black walls, black walls
Tried to hit it with your hands
Or be unconscious of them
But I still stand in the same place
It makes me feel it is kind of animation
One of those with a high-reality
This situation will last forever
This situation will last forever
Never want to get out
Nothing changes inside
This situation will last forever
Never want to get out
Nothing changes inside
This situation will last forever
It's not possible to find a door
When there's no light at all
It's not possible to find a door
When there's no light at all
This situation will last forever
You may bring some wood
We will make a fire
Then we sing the song of your belief
Waiting for your mares
Underneath the smoke
I begin to beg them for relief
When already there
I'll catch some flames
To prepare the bed sheet for them
Before we fall asleep
I will make it sure
So they can not wake up anymore
