## Bad Religion, Yesterday

Run But don't be scared to look behind Stop Don't wait too long make up your mind The end is almost here The sky, the air so nice and clear The sound of your decay And the ringin' in the air is the sweet debris of yesterday There Now that you know it's not so bad See The good things soon flow proximad So if you try to enhance We don't deserve another chance Just laugh along the way And kiss your ass goodbye with a shadow dream of yesterday Yesterday The good old days Yesterday The way we used to play Yesterday It just got worse and worse Yesterday The future's been rehearsed Run But don't be scared to look behind Stop Don't wait too long make up your mind The end is almost here The sky, the air so nice and clear The sound of your decay And the ringin' in the air is the sweet debris of yesterday Yesterday Yesterday
