

# Bamboozled, Can I Walk with You

I woke up this morning  
You were the first thing on my mind  
I don't know where it came from  
All I know is I need you in my life, yeah  
You make me feel like  
I can be a better woman  
If you just say you wanna  
Take this friendship to another place  
Can I walk with you through your life?  
Can I lay with you as your wife?  
Can I be your friend 'till the end?  
Can I walk with you through your life?
